INTERNET PUBLISHING PLANT

7/18/94 Company Confidential

In-house Development Plan

The components above have man-month allocations. There are additional tasks that must be performed in addition to those tasks.

Current staff is 3 (Harry, Margaret, Ben). Kevin and Dan perform minor development roles.

CD-ROM version support: 6 man-months

Client protocol toolkit: 3 man-months

Server publishing tools licensing: 6 man-months when we do it, 1 man-month to help others

Documentation: for V2 would be 1 man-month. For full system would be 6 man-months, client protocol toolkit: 1 man-month, Server publishing tools: 2 man-months.

Support: 1.5 people full time (currently 1)

Release coordinator:?

Demonstration Client Development: 6 man-months for first demonstration.

Protocol Development and Standardization: ongoing 1 person.

CLIENT TECHNOLOGY

- 1.10 Identifying by August 1, 1994, five of the top client development companies to target as marketing, co-development and demonstration partners and having signed letter of intent partnership arrangements with at least three by December 31, 1994.
- 1.11 Developing and having available to market a client tool-kit for Z39.50v2 by September 1, 1994, WAIS Z39.50V2 by March 30, 1995
- 1.12 Developing or partnering a Client prototype by January 15, 1994 which demonstrates the advantages of the WAIS Z39.50 protocol
- 1.13 Having a client development partner ship a new client program which incorporates the WAIS Z39.50 protocol by June 30, 1995

- 1.14 Having available for shipment the 2.0 release of the WAIS server by September 30. 1994
- 1.15 Completing the Network Publishing Technical Design (server release 3.0) by September 1, 1994 (same as 1.6b above)
- 1.16 Having the server release 3.0 installable by June 30, 1995
- 2. Achieve 1995 revenue goals as measured by quarterly revenues (1,000's) of:

	<u>Products</u>	<u>Services</u>	<u>Total </u>
Q1 95	\$330	\$170	\$500
Q2 95	\$470	\$230	\$700
Q3 95	\$540	\$260	\$800
Q4 95	<u>\$670</u>	<u>\$330</u>	<u>\$1,000</u>
totals	\$2,010	\$990	\$3,000

- 3. Establish a distribution process for products and services which provides WAIS access to key national and international markets as measured by:
 - 3.1 Having in place the telesales process and staff to sell two servers per week by August 10, 1994

- 5.1 Hiring a VP/Director of Development by September 30, 1994
- 5.2 Hiring a COO by September 30, 1994

- 3.2 Having the telesales group at a run rate of \$100k per month for the months of October 1994-December 1994
- 3.3 Having the telesales group at a run rate of \$150K per month for the months of January-June 1995
- 3.4 Having signed agreements with six U.S. VARs by January 1, 1995
- 3.5 Having signed agreements with 24 U.S. VARs by June 30, 1995
- 3.6 Having defined and functioning a VAR support process by January 15, 1995
- 3.7 Having signed distribution agreements with at least 3 International Distributor/VARs by January 1, 1995
- 3.8 Having identified and profiled the top 10 Systems Integrators for electronic publishing by January 1, 1995.
- 3.9 Having partnering agreements with at least 3 of the Systems Integrators capable of winning multi-million dollar contracts by January 1, 1995.
- 3.10 Having begun joint design and installation projects with at least two systems integrators (as defined by 3.9) by March 1, 1995.
- 3.12 Having defined the U.S. Federal Government Business Development Process by October 1, 1994 and having consolidated or staffed the office by January 1, 1995.
- 3.13 Having defined a strategy for the telesales role for Production Services by December 1, 1994 for implementation by February 1, 1995.
- 4. Implement a partnering program which insures focus on appropriate partners as defined by the Partnering Strategy document as measured by:
 - 4.1 Signing distribution agreements by December 31, 1994 with international partners who can offer access to the largest Asian and largest European markets.
 - 4.2 Obtaining a commitment from at least two significant systems integrators by October 31, 1994 to make the WAIS, Inc. technology a significant component of their electronic publishing integration strategy.
- 5. Put in place the organizational structure which can take the company through the next two years of rapid growth as measured by:

Wide Area Information Servers

July 19, 1994

WAIS Inc. Production Services Operational Review Company Confidential

Purpose: The goal of WAIS Inc's Production Services is to help publishing partners efficiently set up shop on the Internet. By developing WAIS-based publishing systems that meet the requirements of name-brand partners, the group also serves as a proving ground and development environment for future WAIS Inc. products. The goal for fy 94 is for the production of eight online services.

Strategy: By setting up procedures that allocate resources across various services, WAIS Inc. can develop high–quality for low–cost services. Our experiences can then be transfered to other WAIS Inc. customers.

Process: See diagrams for production services information architecture

• Client handlers: In house personnel, IPs and users will interact with our production services, with various tools for submissions and for access.

IPs have priveleges to modify their services via

- X 25
- ftp (file transfers)
- email

Both data for the service and control information (feed specifications, modification information, access control parameters, etc.) are provided by IPs.

Users can access online service using

- Mosaic and other WWW browsers
- gopher
- WAIS clients

- 3. Establish a distribution process for products and services which provides WAIS access to key national and international markets as measured by:
 - 3.1 Having in place the telesales process and staff to sell two servers per week by August 10, 1994

- email Initially, a user only accesses information from a given service, but eventually that user might submit sign-up information for billing, or profile information for premium service.
- Value added filters: Data and control information into and out of our servers is managed by systems to bring new users onto the servers and to maintain accurate, up-to-date services.
 - Add, delete, modify information in the service
 - Access controls and subscription services
- Ongoing usage statistics and reporting processes Automated tools or staging areas incorporating human review can be used as needed for each service.
- Servers: Production servers are maintained in secure environments, offering verified data services to qualified users.
 - Air conditioning, suitable electrical supply and hazard protection (fire, earthquake, etc.)
 - Continuous, commercial operation with load monitoring, regular backups, access controls, new account acquisition, usage logs, scheduled maintenance and service
 - High bandwidth Internet connection
 - Processing and I/O to handle customer demand
 - Maintenance of updates and service changes

Staffing: We have identified three major operational requirments for Production Services. Each has separate skill requirements and will eventually be staffed by separate individuals. An additional area, Customer Service, will require attention as our services go live.

• Network Services: A single resource can managne several online service operations

Internet connectivity
Machine room operations and facilities
Online services maintenance, updates, backups, and reporting

• Production Engineering: A production engineer develops tools and brings up a service then moves on to the next.

Development of feedhandling systems, and tools for IPs Enhancement of WAIS Inc. publishing systems Adaptation of publishing tools to service needs

• Account Management: An account manager can work with multiple publishing partners.

Single point of contact for publishing partners

Feed Handlers:

Not a very well understood module yet.

Functions:

Schedules and facilitates the incoming data Automated query generators Currently ad hoc libraries and tools Control panel to monitor incoming data steam Query editor interface X.25, SQL, IP email (Rainman), News Feeds, Netnews, NFS

Partnering options:

Man-months to prototype: 1.5

Man-months to full ship: 6

Unformatting:

Currently our custom parser toolkit which requires writing C code for new formats.

Functions:

Finds fields, metadata, etc.
Formats this data for the DBMS
Can this be controlled easily? parse by example?

Partnering options:

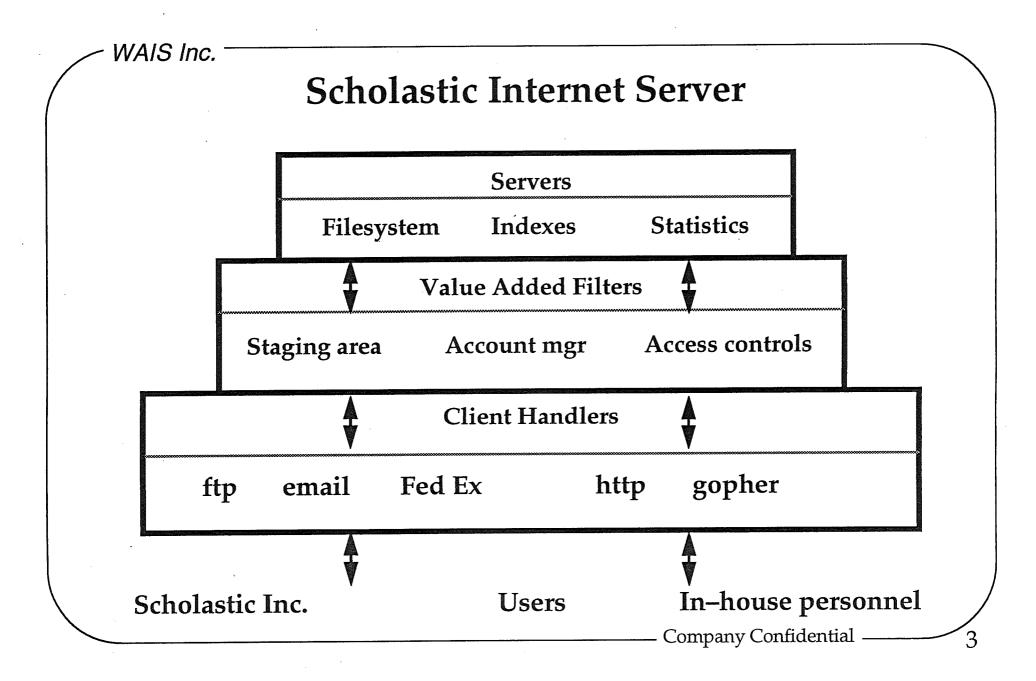

Scripting tools available (perl is freeware, commercial versions available for SGML)

Man-months to prototype: 1.5

Product management for online services Interface to WAIS Inc. sales and marketing

• Customer Service: A service group that work with users across services might be developed in house or outsourced. The requirements for such activity will be developed as our services come online.
